UCITS17Issuer: Rule Results

Results:

1 of 2 sandbox schemes are passing UCITS17Issuer.

Cause:

This rule considers the eligibility of securities and MMI. In aggregate, a maximum threshold of 40% is allowable for non-government securities and MMI; where each underlying issuer holds greater than 5% absolute exposure to the fund.

Where the underlying issuers hold greater than 5% absolute exposure; the exposure percentage of these holdings are aggregated; if 40% is exceeded, then UCITS17Issuer will breach.

This rule uses commitment exposure as a measurement rather than Market Value as it allows for a more representative view of derivatives for the purpose of UCITS17Issuer.

Commitment Exposure is calculated by the below formula:

$$(\text{Quantity} \times \text{Underlying Price} \times \text{Delta} \times \text{Multiplier}) / \text{Underlying FX Rate}$$
